

## **New ranking rated security solutions**

Experts often set different standards than users who are dealing with the solution in daily practice, when assessing a safety solution. In the case of the techconsult Audit Security Solution Vendors 2015, expert and user evaluations are therefore equally included in the assessments and the final ranking. At CeBIT's Security Plaza, Peter Lehre, Principal Analyst at techconsult, presented this year's champions.

Baramundi Software AG was decorated in the Mobile Data Management category, LANCOM Systems in the VPN category, and NCP engineering in the VPN category as well as SSP Europe in the category of e-mail security. All winners have received outstanding reviews from both experts and users.
