Press Report

Jingle bells ringing through the snow – never been safer, the data flow

Podcast on the website: <https://www.all-about-security.de/unter4ohren/single/suesser-die-glocken-nie-klingen-sicherer-die-daten-nie-fluessen/>

I liked the name DRACCOON from the start. Well chosen, nice sound, easy to remember, fits nationally and internationally and it is not a tongue twister. How much it has to do with Draco I do not know. Draco is a type of agamid lizard – a flying dragoon. Is DRACCOON therefore a small flying dragoon? Is there a connection between the name and safe data exchange? Which one? ++ 2018 was a very good year with many awards, certificates, tests & seals, as well as many strategically valuable partnerships etc. Question: Does it bring money to the bank? Can you live from awards? ++ How do people react to the aristocratic title? ++ What are the plans for 2019? ++ Are there differences between the Länder and countries? How is business in Austria? Better, worse...different?! What is it like in Switzerland? ++
