Press Report

## Doxing: Situation Assessment and Consequences

**Mark Schieder, CIO at DRACCOON gives his view on the subject**

**(datensicherheit.de, 24.01.2019)** Right at the beginning of the year, numerous media reported on a far-reaching **hacker attack** on politicians and celebrities in which a large amount of data was compromised. Through “Doxing” private data from 994 persons was published on the internet and temporarily freely available on Twitter – there are different views on whether a single perpetrator was responsible or multiple persons involved.

**Marc Schieder**, CIO at the Regensburg-based company DRACCOON gives his opinion in the following video statement (in German):
